1. In response to amendment after filed on 1 November 2006.

*Reasons for Allowance*

2. Claims 1-30 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

In interpreting the claims in light of the specification and applicant's arguments.

Examiner finds the claimed invention is patentable distinct from the prior art of record.

The prior art of record, Li discloses security in a multicast network traffic by distribution of a group key from a security broker through the each hierarchy level with a Rekey Announcement message. The prior art of record OSPF Version 2, RFC-2328, April 1998 discloses a routing protocol.

The prior art of record, Li in view of OSPF fail to anticipate or render Applicant's particular feature that

**“sending a first message containing a first sequence identifier and a digest of routing information that has been calculated using a first authentication key; and subsequently sending a second message containing a second sequence identifier that is earlier in a sequence than the first sequence identifier”**

As stated in claim 1, or similarly stated in claims 9, 14, 20, 25, 27, and 29

The dependent claims, being further limiting to the independent claims, defined and enabled by the Specification are also allowed.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance”.
